environmental solutions

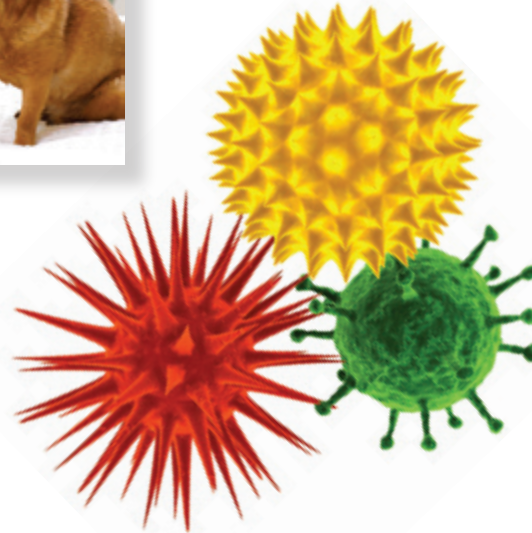

INDOOR AIR QUALITY MANAGEMENT

THE ULTIMATE SOLUTION FOR ENVIRONMENTAL PROTECTION

DECONGREEN Environmental Solutions uses an eco-friendly process that can be applied to almost any toxic situation, leaving the environment free of molds, bacteria, fungi and viruses. EPA approved, there is no harmful or toxic residue left after application. DECONGREEN is completely safe for people and pets.

- Our product is a broad spectrum, bactericide, fungicide and virucide that is the most advanced decontamination, restoration, and remediation available today. It disinfects, deodorizes, removes stains and prevents damage that is caused by growth from mold, mildew, viruses and bacteria.

- Our “one step” application leaves an antimicrobial protection barrier that can result in years of safe protection.
- 12 hours after applied treatment, environment is completely safe and non-toxic for all inhabitants. The result is non-corrosive and non-flammable.
- While other products create costly and invasive demolition, DECONGREEN kills mold, viruses and bacteria with limited need for the additional labor, ultimately resulting in a more cost effective outcome.

PROVIDES UNMATCHED VERSATILITY FOR USAGE IN DECONTAMINATING:

- Hospitals
- Nursing Homes
- Schools
- Prisons
- Wineries
- Sports Facilities
- Meth Houses
- Crime Scenes
- Public Facilities
- Smoke Damage
- Pet Odors
- HVAC Systems
- Private Residences

ADVANTAGES OF USING DECONGREEN:

- Incredible “kill on contact power,” combines 3 mechanisms of action for complete organism kill. EPA approved and is effective against the worse pathogens on all typical surfaces.

PRODUCT HISTORY:

- Originally invented for the Department of Defence and Energy by a renowned national laboratory for use in destroying WMD's (Anthrax) and other bioterrorism agents.
- Was then refined and blended for commercial applications and ease of use.
- Currently, we are developing a commercial laundry detergent for use in all medical facilities worldwide.

environmental solutions

®

EXPERIENCE THE DIFFERENCE

- We have a team of highly trained professionals to address any environmental challenges you may encounter.
- Our rapid response (24-48 hours) will expedite any issues you are having and create a “plan of action” for your situation.
- With resources worldwide, we can accommodate an immediate response wherever the location.
- Free on-site consultation and estimate for your decontamination solution.

VIRAL AND BACTERIAL ILLNESSES

- 1000,000 Yearly deaths from U.S. Hospital-Acquired Infections (HAI's) - Forbes
- 2,000,000 total U.S. HAI's - Forbes
- 19,000 annual U.S. deaths from MRSA infections alone - CDC
- MRSA
- VISA
- VRE
- Pseudomonas
- Salmonella
- E.Coli
- Klebsiella
- Enterobacter / Acinetobacter
- Proteus

WHAT CAUSES MOLD?

Mold can grow on any organic substance or building material. As it begins digesting and growing, this produces thousands of microscopic spores that are released into the air while the destructive and dangerous organisms eventually damage the materials on which they feed and grow.

TOXIC MOLD AND RELATED ILLNESSES

- 40-50 Million people in the United States are affected by Sinusitis (a study done by the Mayo Clinic)
- Chronic Asthma
- Chronic Fatigue
- Painful Headaches
- Disorientation and Dizziness
- Nausea
- Depression
- Diminished Reflex Response
- Diarrhea
- Loss of Concentration
- Rashes and Open Sores
- Possible Death
